In Semester Test-2

Academic Year 2026-2027

UID No: 25MCI10099

Branch : Master of Computer Applications (Artificial Intelligence and Machine Learning)

Subject Code : 25CAT-721

Subject Title : Deep Learning

Semester : 3

Time : 1 Hour

Maximum Marks : 20

Instructions : Attempt all questions

Q. No	Statement	CO Mapping
	Section A **5x2=10 marks**	
1	List four disadvantage of Convolution Neural Network.	CO1
2	Define transfer learning in deep learning.	CO1
3	Explain why VGGNet is considered more suitable than LeNet for deep feature extraction tasks.	CO2
4	Discuss the role of filters in edge detection.	CO3
5	Demonstrate how data flows through a Feed Forward Neural Network from input to output.	CO3
	Section B **2x5=10 marks**	
6	Apply a 3×3 filter on a 5×5 input image matrix with specified values and compute the resulting feature map, detailing each step of the convolution process.	CO3
7	Compare the performance gains of bagging and boosting techniques in ensemble neural networks.	CO4
